

## Care and Cleaning of Acrylic Products

**Washing/Cleaning.** Acrylic may be washed with mild dishwashing detergent and plenty of lukewarm water. Use a *clean, soft* cloth, applying only light pressure. Rinse with clear water and dry by blotting with damp cloth or chamois. Do not use Windex-type glass cleaners. Recommended anti-static commercial cleaners:

**Kleenmaster Brillianize**

**Dusting.** Dust with a soft, damp cloth or chamois. Dry or dirty cloths many cause surface scratches. Do not use rough paper towels.

**Polishing.** Protect acrylic by occasional waxing with a good auto paste wax. Apply a thin, even coat with a soft, clean cloth and polish lightly with another soft, clean cloth. Recommended commercial waxes:

**Mequire's Mirror Glaze # 10 or #17**

**3M Plastic Cleaner #39017**

**3M Plastic Polish #39010**

**Chemical Resistance.** A *partial* list of chemicals that attack acrylic follow. Do not apply these chemicals to your acrylic product.

**Acetic Acid (Glacial)**

**Acetone**

**Benzene**

**Carbon Tetrachloride**

**Chloroform**

**Ethyl Alcohol (95%)**

**Lacquer Thinner**

**MEK**

**Toluene**

**Xylene**
